RaceCom presents

Perceptron™

Finally. A handicapping neural network you can tailor your methods.

Perceptron. A handicapping software that allows you to tailor a new kind of neural network to your needs. The primary advantage of Perceptron is that you can decide which factors you want the software to examine. This has tremendous potential.

The dialog box graphic provided shows 16 different pieces of data the neural network will use in the handicapping process. You can take out as many as you want. For example, if you don't want early pace used in the training and subsequent analysis, just click on the 'Early Pace' box and the program won't use it.

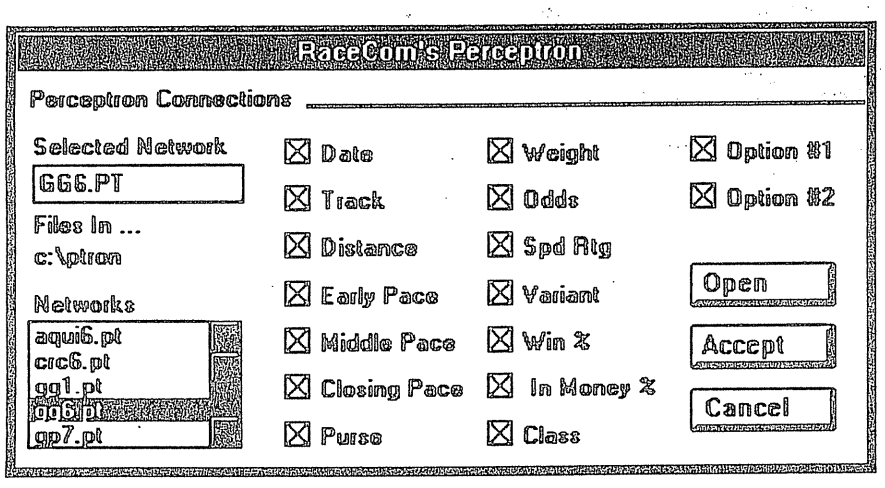

If you want to have several different networks that all look at different sets of factors, you can with ease. Creating several networks will allow you to pin point the data that indicates successful horses.

You can also create networks that function in unison. In other words, you can have a network that looks primarily at class and a different network that looks at early speed. Still a third network could be set up to look at speed ratings and win percentages.

Perceptron is a completely different kind of neural network. To visualize how this network functions, consider data such as times, beaten lengths, and class to be individual pieces of information. Each one of these pieces of information is an *input* to Perceptron. Each piece is assigned a "weight" based on how it affects the outcome of a race.

The importance of this scheme is that *inputs* to Perceptron can be "disconnected" so that the output or decision of the perceptron neural network can be based on only part of the total race data The edge is that, as a handicapper, you have a network that will work just as hard to learn why horses finished as they did with only 3 factors and it would if it had used all 16 pieces of information.

Consider the ability to use a particular group of factors for 3 year olds at 6 furlongs and a completely different set for 4 year olds at 1 mile. Maybe your track favors early speed. Perhaps class is the dominant factor at your track for stakes races. This neural network not only allows you to pick the factors you want to use, it helps you make the decision. The possibilities are endless. Order your copy today.

NEW FROM PHILLIPS

BLOCK 4 METHOD

= 23 PTS

= 12 PTS

Every few months **Phillips Newsletter** writes a new thoroughbred method always striving for more accuracy and quickness of use. In the examples above, you see part of our latest **Block Four Method.** We show the unadjusted point total for the basic part. You adjust this for class, odds, recency and track class to get a final figure, usually in 1 minute or less per horse.

Each method is a bit better than our last and we have a two-fold objective: (1) to get new subscribers to try our monthly newsletter, and (2) to give handicapping help to our thousands of regular subscribers. The entire method is always included in the current PRN edition which also reviews and rates all new t'bred, harness and greyhound methods, computer or regular. Books, too. We've done this for over 15 years.

In the Sept. issue we have our latest method, Block Four, above, based on the last 4 PP lines of each horse. Results for Block Four are almost unbelieveable. We may not try to write anything for some time as this has everything we've been seeking.

Potential new subscribers can get BF through the following special offer.

1. You get 7 issues of PRN for the usual cost of 6 (it costs $6 an issue) .

2. You get our 60 page Master Index which lists and rates everything reviewed the last 15 years (a regular $6 value).

3. Total value is $47 and our special price is just **$35** including the Block Four Method.

Tell us you want to start with the Sept. issue. Send check or money order (U.S. funds please) and we fill all orders by First Class return mail. Send to:

"ROYAL RATINGS"

NEW

Speed, Pace, Variant Service

Unhappy with your selection results? Want to become a highly successful handicapper? Then the "Royal Ratings" may be the "Edge" you need. Hi! My name is Dan Pope, a highly acclaimed handicapping author providing the best racing information since 1979. Now, I continue that tradition with my "Royal Ratings."

SERVICE COVERS THESE 42 TRACKS:

AKS	AP	AQU	ATL	BEL
BM	BMF	BML	CBY	CD
CRC	DEL	DET	DMR	FG
FL	FON	FP	FPX	GG
GP	GS	HAW	HOL	KEE
LAD	LGA	LRL	MED	MTH
OP	PEN	PHA	PIM	RKM
RP	SA	SAR	SPT	TAM
TP	WDS			

All our speed, pace and variant numbers are comparable between tracks and distances. Our numbers are truly unique, while other services equate 1 point to 1/5 second. We do better by equating 1 point to about 1/10 second (1/2 length). This really is significant when comparing races at different distances. Our ratings which cover both dirt and grass races are mailed twice a week. Each new subscription also receives two months worth of back ratings. In addition, each month you'll get a monthly recap by track. Mail slow? Give us a call on our hotline.

The "Royal Ratings" are calculated by computer using a program I developed. Believe me! As a graduate engineer, if there's one thing I know...It's numbers. The program uses my special formulas which produce ratings of unique quality.

Given below are some comments made by our happy customers.

"Many of the prime plays were nice overlays at BEL, HOL, AP & GG. I recommend your ratings for all handicappers." C.H., NV

"I'm a good speed handicapper, but I now rely on your numbers instead of mine. I play SA, MED, AQU, & CD with very good results." A.L., NJ

Using our ratings only you and a few experts will be able to determine the fastest horses in each race. This "Edge" can mean the difference between success or failure. Please rush your order today.

Stallion awards will be paid only to the nominators of fully eligible stallions. Owners who supplement horses to Breeders' Cup Day races will be eligible for the Foal Nominator's Award in the case of a 12 per cent supplementary nomination or both the Foal Nominator's Award and the Stallion Nominator's Award in the case of a 20 per cent supplementary nomination. In accordance with the Breeders' Cup/European Breeders' Fund cross-registration agreement, nominator's awards will not be paid to horses eligible through the E.B.F. All unpaid nominator's awards will remain the property of Breeders' Cup Limited.

BUTAZOLIDIN

information will be printed in

AMERICA'S TURF AUTHORITY

Daily Racing Form

Charts

and

Past Performances

as provided to Daily Racing Form by state and/or track officials responsible for the administration of permissive medication programs.

In both the charts and past performances, Lasix is indicated by the symbol L.

Butazolidin is indicated by the symbol B.

When medication information is provided to Daily Racing Form in time for publication on race day, those horses who will race on Lasix and Butazolidin will be listed at the start of the past performances for each race.

Daily Racing Form's new medication information is effective with the racing of July 1, 1990. Any medication prior to that date will NOT be printed.

The following is an example of how the medication is shown in the Medication/Equipment column of a chart and then reprinted in the past performances the next time the horse runs:
